

RollaPoll for Windows

Ultimate survey app for touchscreen kiosks and tablets

Smart Survey Management in Action

Cloud-based
Survey App

RollaPoll for Windows is a cloud-based survey data collection and survey reporting app, available through subscription.

It is suitable for survey kiosks and survey tablets with Wi-Fi, running under Windows 10, 8, 7.

RollaPoll gives you the extra survey power you always wanted.

Efficiency and convenience at your finger tips.

Measure customer experience efficiently

RollaPoll makes your survey devices work for you harder.

RollaPoll for Windows excels through its efficient workflow that helps automate survey management for Wi-Fi connected survey kiosks and tablets.

Captured survey data are synchronized with the RollaPoll web portal. Where Wi-Fi is temporarily unavailable, survey data collection can work offline.

Users can monitor the survey data collection progress, and view survey results and charts in real-time. Insightful, ready-to-use reports, as well as a range of data management tools, e.g. a variety of data filters and cross tabulations make reporting a breeze. Raw data can be exported in Excel and Digivey Analyzer compatible formats.

RollaPoll for Windows is equally well suited for self-administered as well as interviewer assisted surveys. It is fully compatible with other members of the Digivey survey software family.

The RollaPoll for Windows survey app helps automate survey management and cuts down workload and costs.

Looking to cut down on workload, time, and costs associated with on-site customer surveys?

RollaPoll reduces the workload with self-service touch screen kiosk surveys and tablet surveys to the minimum, and makes intensive use of automated survey deployment and data transfer processes. The user can concentrate on questionnaire creation and reporting. RollaPoll takes care of the rest.

Gathering customer feedback couldn't be easier. Let RollaPoll capture and manage the customer feedback journey for you at affordable prices.

Save workload and time.

Streamline surveys run on touchscreen kiosks and tablets.

Key Features of RollaPoll for Windows

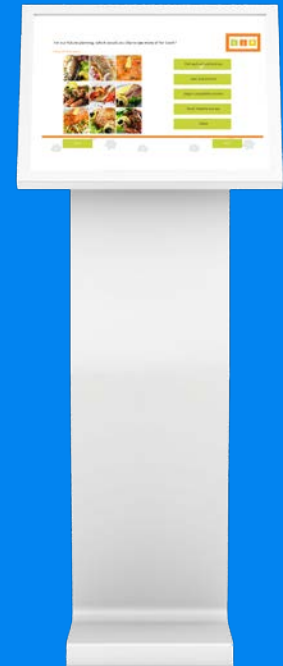

Customizable, interactive surveys from a trusted source

Features include:

- Wide range of question types: Single choice, multiple choice, opinion grids, open comments, address forms, and more
- Rating, ranking, piping (text replacement), rotation, and randomization
- Interactive questionnaire design with branching and conditional skipping
- Portrait or landscape survey screens, auto-resizing to fit the display of your devices
- Branding and customization of your surveys
- Single and multi-language questionnaires; right-to-left as well as left-to-right languages
- Multimedia enhanced questionnaires; add pictures, videos, sound to make survey questionnaires more interesting.

With the broad acceptance of Wi-Fi connected survey kiosks and survey tablets, the newest member of the Digivey survey software family, RollaPoll for Windows, supports new ways of automating the survey process.
